**VICTORY MARK II**

**Recirculating Air**

A regularly scheduled sweeping program for your parking areas and streets will help you maintain a fresh, clean appearance for your property while prolonging the life of your pavement and striping.

**SERVING:**

- Homeowner Associations
- Private Streets & Master Associations
- Apartment Communities
- Industrial Complexes
- Retail Properties
- Office Properties
- Hotels & Resorts

**PROFESSIONAL**

Sunstate provides a comprehensive job proposal prior to sweeping based upon your specific needs. Our uniformed sweeping teams utilize only air and broom sweepers, the highest rated equipment in the industry. Whisper Wheel Technology assures extremely quiet, efficient property maintenance.

**DEPENDABLE**

Sunstate takes pride in dependable service for each of our customers. Our radio dispatched trucks and operators are fully bonded and insured. From the front office staff and our professional field teams to the best designed and maintained equipment, you can depend on Sunstate to be there when you need us.

**THOROUGH**

Sunstate uses only the most advanced air sweepers that are capable of picking up anything loose on the pavement. Our sweepers feature rotating gutter brooms that will clean your curb-line for greater curb appeal. Backpack blowers are used prior to sweeping for hard to reach areas such as corners, gated areas and covered parking.

**ECONOMICAL**

A regularly scheduled Sunstate maintenance program can actually prolong the life of your pavement and paint striping, thereby delaying costly resurfacing expenses. Sand, rock and debris act as an abrasive. Removing this material on a regular basis assists in preventing potholes, cracking and striping erosion.
